

Compatible with Expedy Print's cloud printing solutions

This Prestashop module is made to **work with Expedy's cloud printing solutions connected to a Prestashop website** and other ecommerce platforms.

These IOT Cloud printing solutions are exclusive to Expedy Print and available online in our eshop.

You can contact us if you want more information our Cloud printers and our Cloud Print Box compatible with multi-brand printers.

Expedy Print's Cloud Printer Server

- Enable the printer to be connected to **modules and plugins from your website** or other web applications
- **Collect** then **process** the information to **convert them into a receipt** ready to be printed
- Operates tasks **automatically** and **independently** (ex: send printing request, sort information, layout of the receipt, ...)
- Includes : 1000 free printing requests per month in the first year after purchase, and 7/7 support by chat or email
- QOS2 technology : **deliverability of messages** up to 99.999999 %
- Guarantee against loss of data : the document is saved in the Printer Server until the printer is connected again to internet, the receipt is printed again if there wasn't any paper roll or enough paper to print the whole receipt

Functions of our module

- **Information about the order:**
reference, names, address, email, phone number, delivery mode, choice of payment ...
- **Information about the shop:** logo (url image PNG/JPG), name of the shop, address, phone, ...
- **Personnalised name for the items:** name of the item alone, with attributes or references
- **Sums :** with or without VAT, with or without the totals
- **Printing options :** print all new orders or all new accepted orders
- **Replicate receipts :** up to 5 copies of the same receipts
- **Miscellaneous:**
customer's notes, delivery date and time, private notes, EAN or bar codes, discount codes, thank you messages, ...
- **Modules :** store pickups, delivery courier, opening hours, ...
- **Languages :** French, English, (other languages : contact the support team)

Only 2 min to install and parameter it !

Other compatible Prestashop modules

Our Printer Point module for Prestashop can be used by other modules to print further information, such as the type of delivery, the date and time of delivery, etc. For more information about other compatible modules, contact our support.

- Pickup at Store Module (BELVG)
- Preferred Delivery Time (Knowband)
- Configurator of product (DMConcept)
- Nearby Delivery with time slots (Prestatill)
- Drive, Click & Collect / Retrait Magasin (Prestatill)
- PrestaDrive

NB : We can't guarantee that all information of your orders will be correctly printed if you have modified your Prestashop or installed other modules that might affect original functions of a Prestashop website. If your receipts don't have all these information, you can contact us to have a customization of the module.

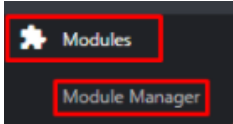

Multi printers / Marketplace

You can add more than one Expedy Print's printer to your Prestashop website.

If you have more than one store, you can decide for example to send the receipt to prepare the order to the London shop (LONDON01) thanks to the printer AA001 and not to the Edinburgh shop (EDINB002) connected to the printer AA002.

How to install the module

- Download the .zip file of this Expedy module for Prestashop
- In your Prestashop Dashboard, click on MODULES and then on MODULE MANAGER

- Click on UPLOAD A MODULE

Module Manager / Modules

Module manager
